My name is Jared Surato, I am a learner, tinkerer, and problem solver.

I am a student at Michigan State University studying Computer Science, with a focus in Media and Information. The key courses that I have completed are Algorithm Engineering, Software Engineering, Web Design and Development, and Databases. I plan on taking Web Application Architecture and Development as well as Mobile Application Development. Outside of the classroom, I am always finding new hobbies to dive deep into, learning many useful tricks. Some of my hobbies are woodworking, computer building, and reading. All of these hobbies, my work experience as well as my courses have taught me the invaluable skill of problem-solving.

Persona 1: Company Recruiter looking for my resume and to learn more about me. This person would be accessing my page most likely for work, through a desktop/laptop

Persona 2: Senior Software Developer / Manager looking to see my portfolio website to see what kinds of work I have done. This person would be accessing my page most likely for work, through a desktop/laptop

Person 3: Social Media connection (LinkedIn, Instagram, Twitter, etc.) exploring my website to see what I have been up to. Most likely accessing my site on a mobile device.
